

Custom Dial Printing

Ashcroft® custom-designed dials enhance a pressure gauge or dial thermometer by providing clear and specific application information, greater visual appeal and brand visibility.

Our graphics expertise and unique printing process make nearly anything possible, including multiple colors*, scales, visual operating ranges and custom company logos.

(*Metallic inks not available.)

Custom Dial Printing

Ashcroft offers a custom dial printing option to enhance your pressure and temperature instruments!

ASHCROFT

TAG NUMBERS

Tag numbers, approvals or application directives provide operators with essential technical information for easy communication and documentation.

ZONE INDICATORS

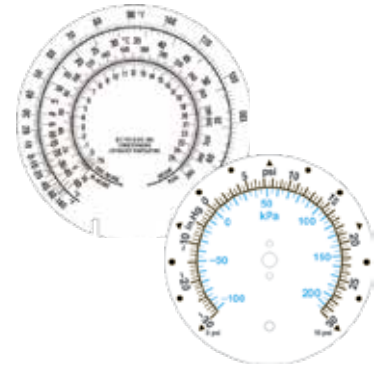

Zones marked with color bands allow operators to quickly identify and process pressure measurements in safe, cautious or dangerous states.

ASHCROFT

ALTERNATE SCALES

Alternate scale options, including torque, temperature and force, relating pressure to scales that better fit your application.

MULTIPLE SCALES

Single, double and triple scales clearly display pressure readings.

COMPANY LOGO

High-resolution custom logos let operators know who is protecting their process simply by looking at the dial.

COLOR ACCURACY

True PMS® ink matching and opaque white ink are UV cured to resist fading. We supply PDF approval proofs.
