

PRODUCT INFORMATION**DIALS FOR 2½" AND 3½" 1009 GAUGES**

There has been some confusion regarding the dial color of 2½" and 3½" Type 1009 gauges. The standard dial is brushed aluminum with black letters. We are able to finish white dials with black letters as an option, Code XWN, at no additional charge, but unless otherwise specified product shipped will be finished with brushed aluminum dials.
