### Electronic Product Reference Guide

#### A2 Pressure Transmitter:
Heavy industrial pressure transmitter used on fast-stands, compressor control, hydraulic systems, process automation, pump and pneumatic systems control.

#### AXX Pressure Transmitter:
crif, and ATEX listed explosion proof/flame proof pressure transmitter used with oil field equipment, upshot of oil and gas production, natural gas compression and transfer control as well as alternative energy projects.

#### AZ Pressure Transmitter:
CSA and FM listed, Intrinsically Safe and Non-Incendive pressure transmitters used in on-field equipment, upstream oil and gas production, natural gas compression and transfer control as well as alternative energy projects.
